SKILLS

- Unreal Engine
- Unity (Game Development Environment)
- Godot Engine
- Software Development Fundamentals
- Problem Solving and Logical Thinking
- Basic Programming and Project Implementation
- Familiarity with Development Tools and Academic Software Projects

LANGUAGES

- English (Fluent)
- Bengali (Fluent)

ECA

- Sports

PROFILE

A motivated and dedicated Computer Science and Engineering student with a strong interest in the software development domain. Possesses hands-on experience in academic projects and practical exposure to development tools and environments. Demonstrates solid problem-solving ability, adaptability, and a professional attitude toward learning and responsibility. Eager to apply technical knowledge in real-world scenarios while contributing positively to organizational goals.

EDUCATION

North Western University, Khulna
Department: Computer Science and Engineering (CSE) Current Status: 3rd Year, 2nd Semester Expected Graduation Year: 2028

Navy Anchorage School and College, Khulna
Higher Secondary Certificate (HSC) – Science Year: 2022 GPA: 5.00 / 5.00

Secondary School Certificate (SSC) – Science Year: 2020 GPA: 5.00 / 5.00

EXPERIENCE

- **Unreal Engine:** Built Croc Royale solo, a 4-player online battle royale in Blueprints with EOS multiplayer, server-authoritative combat, AI prey and a Blender/Python animation pipeline.
- **Unity:** Built Greenhand solo, a 3D first-person farming simulator in Unity 6 (URP) with C#, NavMesh customer AI, a day/night cycle and JSON save/load.
- Designed and implemented a Hostel Management System, gaining hands-on experience in system design, logical structuring, and data organization.
- Developed strong problem-solving skills through planning, implementation, and handling of software workflows.
- Gained analytical thinking and strategic planning abilities through extensive PC and strategy-based gaming.
- Improved decision-making under pressure and adaptability by interacting with complex game mechanics and dynamic systems.
- Enhanced understanding of user interaction and system behavior, supporting interests in software and game development using environments such as Unity.

PROJECTS

Croc Royale – 4-Player Online Battle Royale

Solo developer | Unreal Engine 5.8 (Blueprints) | Aug – Oct 2026

- Built a complete online battle royale solo: main menu, EOS lobby, 2 km map, shrinking safe zone and winner screen, playtested over the internet on separate PCs.
- Implemented listen-server multiplayer for up to 4 players with Redpoint EOS: host/join sessions, server-authoritative combat, RepNotify world state and multicast animation.
- Designed 5 attacks, hit reactions, knockdowns and cooldowns using socket-based sphere overlaps with a per-swing hit guard that prevents double damage.
- Rigged a 29-bone crocodile in Blender and generated 40+ in-place animations with Python scripts; built the Animation Blueprint state machine.
- Generated the island map from code (Python heightmap and layout, Unreal Python builder); added server-side AI prey and eat-to-grow progression.
- Optimised the player mesh from 966k to 14.5k triangles and tuned foliage and clouds to reach about 60 FPS on an Intel Arc A750.

Greenhand – 3D First-Person Farming Simulator

Solo developer | Unity 6 (URP), C# | Published on itch.io

- Built a complete farming loop: plant growth with watering and fertilizing, 7 unlockable plant beds, 2 crop types and a tool upgrade system.
- Implemented a customer queue and selling system with NavMesh-based customer AI, plus a day/night cycle with sleep mechanics.
- Developed a full JSON save/load system.

PERSONAL INFORMATION

Name: SM Jubayed Hasan Hemel
Father's Name: Md. Nazmul Hossain
Mother's Name: Roxama Afroze
Present Address: No.1, Goalkhali Main Road, Khalishpur, Khulna, Bangladesh.
Permanent Address: No.1, Goalkhali Main Road, Khalishpur, Khulna, Bangladesh
Date of Birth: 1 September 2004
Nationality: Bangladeshi
