PROFILE

A Computer Science and Engineering student with a strong focus on Unity game development. I build complete, playable games from scratch – handling everything from gameplay systems and AI to save/load, UI, and audio. My most recent project, Greenhand, is a full 3D first-person farming simulator built solo in Unity 6 with URP. I am actively seeking part-time remote game development opportunities where I can contribute real value while continuing to grow as a developer.

EDUCATION

North Western University, Khulna

Department: Computer Science and Engineering (CSE) Current
Status: 3rd Year, 2nd Semester Expected Graduation Year: 2028

Navy Anchorage School and College, Khulna

Higher Secondary Certificate (HSC) – Science Year: 2022 GPA: 5.00 / 5.00

Secondary School Certificate (SSC) – Science Year: 2020 GPA: 5.00 / 5.00

PROJECTS

Greenhand – A Peaceful Farming Journey (2026, Solo Developer)

- Complete plant growth system with watering and fertilizing mechanics
- 7 unlockable plant beds with 2 crop types (Tomato & Corn)
- NavMesh-based customer AI with queue and selling system
- Day/Night cycle, sleep mechanics, tool upgrade system
- Full JSON save/load system
- Play: sm-jubayed-hasan-hemel.itch.io/greenhand
